

SUMMARY

Full-Stack Developer with 3+ years of experience building scalable backend systems and enterprise platforms, specializing in Java, Spring Boot, NestJS, and Angular. Proven track record in insurance and e-commerce domains, delivering microservices architecture, payment integrations, and CI/CD pipelines. Passionate about writing clean, efficient code and contributing to high-impact products.

EDUCATION

Maejo University 2018-2022

Bachelor of Science in Information
Technology Faculty of Science
GPA: 3.42 / 4.00

Key Coursework

- Object-Oriented Programming
- Server-Side Programming
- Mobile Application Development
- System Analysis and Design

TECHNICAL SKILLS

Languages

Java, Kotlin, TypeScript, JavaScript,
SQL, HTML, CSS / SCSS

Frameworks & Libraries

Spring Boot, NestJS, Angular

Databases

PostgreSQL, MySQL, MariaDB

DevOps & Deployment

Docker, Jenkins, Nginx

Tools & Platforms

Git, Bitbucket, SourceTree, GitFiend,
DBeaver, IntelliJ IDEA, VS Code,
Postman, Termius, JasperReports

WORK EXPERIENCE

Rider Insurance Broker Public Company Limited

Full Stack Developer | 2024-present

Core Insurance & E-Commerce Platforms

- Designed and developed CO-OP, an online term life insurance platform, handling both frontend and backend development using Java, Spring Boot, Angular, and PostgreSQL.
- Built GO MAX (Travel Accident), GO Inter (International Travel), Kan-Knock (Personal Accident), and Double-Care (Accident & Critical Illness) insurance purchasing systems using Spring Boot and PostgreSQL.
- Developed an internal Quotation & Policy Management System enabling staff to efficiently generate quotes, invoices, job notifications, and issue insurance policies.

Enterprise Architecture & Shared Services

- Engineered One-ID, a centralized Identity and Access Management (IAM) system using NestJS and Better Auth to handle unified authentication across all company applications.
- Implemented a centralized Payment Gateway service to seamlessly manage customer transactions and orchestrate third-party payment provider integrations.
- Developed and maintained utility Microservices, including an OTP gateway, Message Sender, LINE Bot, and an Amazon S3-backed File Storage Service.

DevOps & Infrastructure

- Managed and streamlined CI/CD pipelines using Jenkins to automate software builds and containerized application deployments via Docker.

HandyWings Co.,Ltd

Backend Developer | 2022-2024

- Developed and optimized scalable Microservices including Payment, Notification, OTP, and File Services to support high-traffic operations.
- Designed and implemented a robust Webhooks Module and Public APIs to facilitate seamless third-party integrations.
- Collaborated on the MoveMax OMS (Order Management System), building core modules to improve order processing efficiency and system reliability.
- Utilized database management tools to optimize queries and schema designs for relational databases.

Maejo University

Senior Project | 2021

- Website for the service of scientific equipment for the Faculty of Science, Maejo University, using Spring MVC Technology.
